- Includes built-In RJ-45 Crimper
- Heavy Duty design for professional use
- Constructed with table-top termination base
- Compact for easy storage

KEYSTONE TERMINATION

Part No. TEL-6060

This new Quest **EZ-TERM Keystone Crimp Tool** is designed for Single-Punch Termination of Quest Slim-Style 90° Keystone Jacks.

In a single punch it will simultaneously terminate all 4-pairs of wires to the 110 IDC on a Quest Slim-Style RJ-45 Keystone Jack, while trimming off the excess wire.

Built into the tool handle is a convenient RJ-45 crimp tool used for termination of any standard RJ-45 (8p8c) modular plug.

Flexibility in design allows this crimp tool to be used as a hand crimper or a table-top termination press.

RJ-45 TERMINATION
